SmartScan Programmer

Infrared programmer for SmartScan luminaires

An ergonomically designed, hand-held, infrared programmer for Thorlux SmartScan luminaires.

Infrared technology allows the user to connect to the luminaire without the risk of climbing to the ceiling. The SmartScan Programmer can control operational settings, read luminaire status, and initiate system tests. Furthermore, it configures wireless communications and the mesh network preferences for connected SmartScan luminaires.

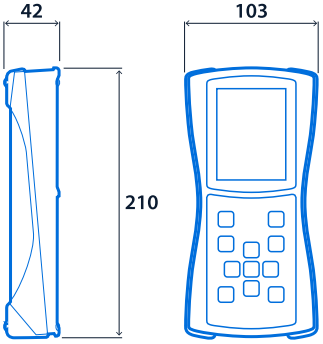

- Rugged silicone sleeve for improved durability
- Sealed keypad
- Programs operational settings, reads luminaire status and initiates system tests
- Configures wireless communications and mesh network
- Tests emergency luminaires
- Reads back status information from SmartScan emergency luminaires and compatible SmartScan Sensors
- Powered by Lithium-ion battery - rechargeable via USB-C port
